**Subject:** Lights on El Segundo Blvd

Elected Officials,

I'm writing to voice my concern over the light sequencing on El Segundo Blvd. Since the new Raising Canes has been constructed the new light with no name, Continental Blvd, Illinois St, and Douglas St haven't been working correctly, now with the construction it's twice as bad. The engineering needs to be changed or corrected on them so they're more efficient. They stop 50 cars to let 2 go through which has cost me countless hours and definitely isn't environmentally friendly with all the extra idling cars. Can you please talk to the city Engineering Department to get this corrected.

Thank you,  
Tim Paustian
